How Applicable Day 20 Is Used in Dropout Reports

11/22/2026 8:45 pm EST

Summary

The **(NC) Dropout Data Collection** uses an **Applicable Day 20** to evaluate whether subsequent enrollment removes a student from dropout reporting.

The Applicable Day 20 may differ by student because the reports consider the current year Month 1 end dates for both the prior reporting school and a receiving school.

This article explains how the reports calculate and use the date. Refer to the current **Dropout Data Manual** (https://www.dpi.nc.gov/data-reports/discipline-alp-and-dropout-data) for the reporting requirements associated with Day 20.

How the Applicable Day 20 Is Determined

The reports may use the following dates:

- The current-year Month 1 end date for the student's prior or reporting school
- The current-year Month 1 end date for the student's current school

When both dates are available, the report uses the later date as the student's **Applicable Day 20**.

Prior School Day 20	Current School Day 20	Applicable Day 20
September 1	September 8	September 8
September 8	September 1	September 8
September 1	Unavailable	September 1

Using the later date prevents the report from evaluating a student against a date that occurred before the current school completed its first school month.

Missing Day 20 Information

If only 1 usable school specific Day 20 is available, the report uses that date.

If a required school specific date is unavailable, the report uses the most frequently reported Day 20 across all school calendars as a statewide fallback date.

A fallback date may indicate that the School Months information for a school requires review.

> **Note:** The statewide fallback allows the validation to continue when a school-specific date is unavailable. It does not replace the requirement to maintain accurate School Months information.

How Enrollment Is Evaluated

The reports use the student's Prior Enrollment Type to determine how current year enrollment is evaluated against the Applicable Day 20.

Early Leaver

An Early Leaver must be in a qualifying enrollment on the Applicable Day 20 for the enrollment to remove the student from the report.

An enrollment that ends before Applicable Day 20 does not remove an Early Leaver from the report.

Completer

A Completer must have at least 1 day of qualifying enrollment on or before the Applicable Day 20.

The enrollment does not have to remain active through the Applicable Day 20 to remove a Completer from the report.

Previous CCAHS

A Previous CCAHS student must be in a qualifying enrollment on the Applicable Day 20 for the enrollment to remove the student from the report.

Comparison by Prior Enrollment Type

Prior Enrollment Type	Enrollment Requirement Used by the Report
Early Leaver	In a qualifying enrollment on the Applicable Day 20
Completer	At least 1 day of qualifying enrollment on or before the Applicable Day 20
Previous CCAHS	In a qualifying enrollment on the Applicable Day 20

Example
A student's prior school has a Day 20 of September 1. The current school has a Day 20 of September 8. The report uses September 8 as the Applicable Day 20.
The student enrolls in the receiving school on August 20 and exits on September 5.

- If the student is an Early Leaver, the enrollment does not remove the student because the student was not enrolled on September 8.
- If the student is a Completer, the enrollment removes the student because the student had at least 1 day of enrollment before September 8.
- If the student is Previous CCAHS, the enrollment does not remove the student because the student was not enrolled on September 8.

Qualifying Enrollments

An enrollment must meet these requirements:

- Primary enrollment
- State reporting inclusion
- Regular school year enrollment

The reports do not use the following as a qualifying enrollment:

- No show enrollments
- Summer school enrollments
- Enrollments excluded from state reporting

A no show or summer school enrollment may appear later in the student's record without replacing the student's authoritative actual enrollment.

Multiple Current Year Enrollments

When more than 1 qualifying current year enrollment exists, the report selects the enrollment closest to the Applicable Day 20 for display.

Review the student's full enrollment history when the displayed record does not provide enough information to determine the correct outcome.

Enrollment in Another PSU

The reports search statewide enrollment data by student. A student's prior PSU can see if there is enough enrollment evidence to determine whether the student' can be removed from dropout reporting.

The report may display:

- Receiving PSU
- Receiving school
- Enrollment start date
- Whether the enrollment occurred during the same reporting year or the current year

The report does not display the subsequent enrollment end date when presenting cross-PSU enrollment evidence.

Use the State Student Locator (https://ncdepartmentofpublicinstruction.knowledgeowl.com/home/state-student-locator) when additional statewide enrollment research is needed.

How the Date Affects the Reports

Potential Dropouts

A student may remain in **DOP07 - Potential Dropouts** (https://ncdepartmentofpublicinstruction.knowledgeowl.com/home/review-potential-dropouts-dop07) when the report does not find enrollment that meets the requirement for the student's Prior Enrollment Type and Applicable Day 20.

Review:

- Prior Enrollment Type
- Prior school Day 20
- Applicable Day 20
- Current year enrollment evidence
- Dropout record indicators
- Graduation and W3 evidence

Edit Checks

A student may appear in **DOC02 - Enrollment Checks** (https://ncdepartmentofpublicinstruction.knowledgeowl.com/home/doc02-enrollment-checks) when an open Dropout program record conflicts with qualifying enrollment.

Related Issue Codes include:

- OPEN_DROPOUT_WITH_CURRENT_YEAR_ENROLLMENT
- OPEN_DROPOUT_WITH_SUBSEQUENT_MEMBERSHIP

Review the displayed evidence before end dating or otherwise correcting a Dropout program record.

Review Unexpected Results

When a student appears unexpectedly in the potential dropout report or edit checks:

1. Confirm the student's **Prior Enrollment Type**.
2. Review the prior school's current year Month 1 end date.
3. Review the current school's current year Month 1 end date, when applicable.
4. Confirm the **Applicable Day 20** displayed by the report.
5. Review the current year enrollment start and end dates.
6. Confirm that the enrollment represents actual membership.
7. Review no show, summer school, and state exclusion information.
8. Correct inaccurate source data.
9. Review the report again after the nightly refresh.

Do not change an accurate enrollment or School Months record solely to remove a student from a report.
