If a student does not have an active enrollment, check with the data manager to ensure the enrollment is up to date. Enroll dates must be on or before today's date. Once the date has passed the student should become active. The data manager should know how to correct the issue, if for some reason this does not happen. If they do not, they can contact support.

**\*\*Duplicate Classes:** If your teachers departmentalize, check to ensure individual sections are not represented (i.e., two different sets of students for content area), before manually deleting those classes with no student data.

**Use the [RtA Staff Roles](#) article to add roles to staff.**
