Post Grades

- Consider only opening only one term/task grading window at a time to prevent accidental posting errors.
 - [Grading Window | Infinite Campus](https://kb.infinitecampus.com/help/grading-window) (<https://kb.infinitecampus.com/help/grading-window>)
- Verify all student final grades have been posted by teachers.
- Generate the [Grades Report \(Grading and Standards\) | Infinite Campus](https://kb.infinitecampus.com/help/grades-report-grading-and-standards) (<https://kb.infinitecampus.com/help/grades-report-grading-and-standards>) to review missing grades. The same report can be used to review all final grades are per PSU policies.
 - Run this daily during the grading window to ensure grades are posted accurately.

Grades Batch Report

This report will batch print students' grades. There is an option to print the report grouped by student, teacher or course. There is an option to set a page break for each student or course, suitable for handing out. The grades report group by Teacher will always set a page break for each teacher. This is a very complex report, so try to limit the number of students run per batch. Checking the page break option will make the report run faster.

Post Grades to Transcripts

The Transcript Post tool takes scores from the Grade Book and posts them to the student's transcript. Scores from Grading Tasks or Standards marked as Post to Transcript and associated with a Credit or Standard group will post. There are three posting options:

- Post Courses, Scores, & Credits by Term: used to post scores and credits for any grading task or standard associated with a term or terms.
- Post One-Time Grading Task or Standard: used to post scores and credits for one-time tasks/standards that are scored once and are not associated with a term.
- Post Courses and Scores Only for All Terms: used to post scores only (no credits) for any task or standard.

This tool can be used multiple times without duplicating records, which prevents a score changed by a teacher in their gradebook from affecting a posted transcript record. After the Transcript Post process is complete, any necessary changes to scores need to be manually updated on the student's transcript. Credit information can be added to the records created using the first option and selecting the applicable terms and credit groups.

Retentions at End of Year

Students that will be retained at the end of the school year will need to have their end status and end date updated prior to processing all other students' end enrollment. This process can be done by updating each individual student's current enrollment local end status and end date or can be done by creating Retention ad hoc filter. The sections below provide a guide on creating a Retention Filter and updating the local end status and end date using the filter.

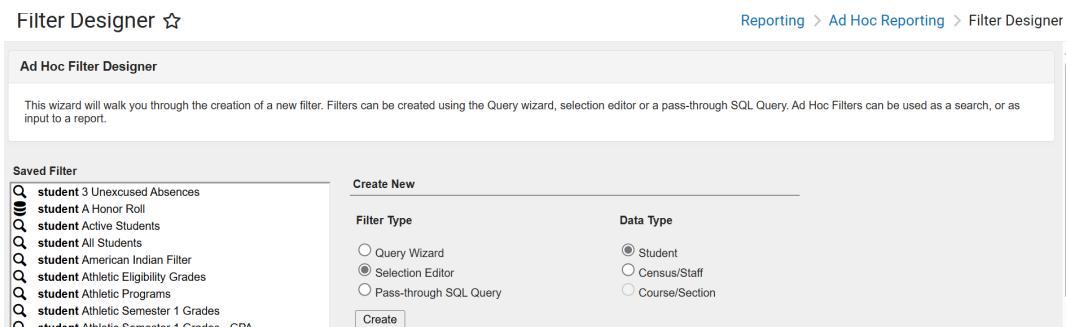

Retention Filter | End Retention Enrollments | Update Retention End Status | Update Future Enrollment | Validate Retentions

Create Retention Filter

Create a Retention ad hoc filter to use to complete the end enrollment process with the correct end status for retained students. This can be completed by creating a multi select ad hoc or a selection editor ad hoc.

Use the [Infinite Campus Multi-Select](https://ncdepartmentofpublicinstruction.knowledgeowl.com/home/multi-select) (<https://ncdepartmentofpublicinstruction.knowledgeowl.com/home/multi-select>) article as a guide for how to create a multi select ad hoc filter for retained students.

The Selection Editor ad hoc filter will allow users to select the students from a list.

End Retention Enrollments

Students that will be retained must have their enrollments ended prior to the full end enrollment process. Follow the steps below to end retained student's enrollments for the current year.

Before ending current year enrollments, ensure student enrollments have been rolled forward.

Make sure the school context is the current year.

Navigation: Student Information > General Student Administration > Enrollment End Batch Wizard

1. Select the **calendar(s)**
2. Select the **grade levels** that are included in the Retention filter.
3. Select the **Retention** Ad Hoc created earlier.
4. Enter the **last instructional day** of the current school year as the end date.
5. Select **RT: Retained** as the local end status.
 - a. Note: If a specific retention reason code is typically used for all students to document retention information, choose the appropriate retention end status for this step.
6. Click **Run** to end the current year enrollments for Retained students.

Enrollment End Batch Wizard ☆

Student Information > General Student Administration > Enrollment End Batch Wizard

Enrollment End Batch Process

This tool processes enrollment records for all students in the selected calendars and grade levels at the end of the school year. Enrollment End Dates, Enrollment Statuses and Graduation information, if entered, are applied to all student enrollments that match the entered criteria. Use the Enrollment Roll Forward tool to copy and promote enrollments into the next year's calendar.

Enrollments and Graduation records are only modified if the fields selected to be filled on this editor are blank on the student's Enrollment record and on the student's Graduation tab. If there are Enrollment records or Graduation data that have those fields populated, those records will not be modified (i.e., dropped students). Students who are graduating should be processed separately from other grades in order to have the Graduation values entered. Students who are already marked as Retained or Demoted on their Enrollment records will not be processed by this tool.

If students are assigned academic plans, process the graduating class using the Post Diplomas mode on the Course Plan Admin tool. This applies the correct diploma type based on the student's academic plan, assigns graduation dates and ends enrollment records only for those graduating students.

- Pause any task scheduler automated tasks until the new year.

The screenshot shows the 'Task Scheduler' interface. At the top, there are buttons for 'New Task', 'Save', and 'Delete'. Below is a table titled 'Scheduled Task List' with columns: Name, Start Date, Frequency, and a status indicator (red circle). The table contains several entries, including 'Batch Queue Maintenance', 'Change Unknown Absence to 2A', 'CTE Program Auto Assign', 'Flag Ath Assignment', 'Messenger Maintenance', and 'POSExtract'. The 'Change Unknown Absence' task is selected, and a detailed view is shown in a modal window. The modal has fields for 'Name' (highlighted in red), 'Start Date/Time' (10/15/2024 03:30 PM), 'Stop/Pause Execution' (checkbox checked), 'Recurring Frequency' (Daily), and 'Tool Code'. Below these fields is a 'Task Type' section with radio buttons for 'SQL Script' (selected) and 'Java (Prism URL call)'. The 'Tool Code' section contains a large block of SQL code:

```

    Name: Change Unknown Absence
    Start Date/Time: 10/15/2024 03:30 PM
    Stop/Pause Execution: checked
    Recurring Frequency: Daily

    Task Type: SQL Script

    AND x.calendarid = a.calendarid
  
```

- For automated Data Extract Utility jobs, add a check to the Stop checkbox until the new year.

The screenshot shows the 'Data Extract Schedule' interface. At the top, there is a section titled 'Data Extract Schedule' with a 'Stop Automated Extract' checkbox checked (highlighted in red). Below this are fields for 'Frequency' (None), 'Start Date' (02/25/2025), 'Start Time' (00:00), and 'Day of Week' (Sunday). The 'Day of Month' field is set to 1.
