

OLR Resources

10/30/2025 9:35 am EDT

The OLR **Configuration and Build Collaboration Folder** is a shared space designed to support Online Registration (OLR) setup and maintenance. It includes helpful resources such as presentations, build files, checklists, workflows, and other tools to guide you through the configuration process.

PSUs are encouraged to share exported configuration files from their previous OLR builds. Contributing your materials helps others learn from your setup and makes it easier for everyone to streamline their own OLR builds.
