

PMR Info Validations Overview

10/02/2026 6:38 am EDT

INFO validations identify conditions that should be reviewed for accuracy or awareness. Select the applicable validation rules below to determine what information should be verified and whether additional action is needed.

Info validations do not have to be cleared to review the PMR extract reports, but the information should be verified and corrected if not valid.

Navigation: Menu > Reporting > Data Validation > Data Validation Report > M# PMR Validations INFO
